Completed on	Friday, 7 August 2026, 8:57 AM
Time taken	23 mins 41 secs
Marks	1.00/1.00
Grade	**10.00** out of 10.00 (**100**%)

Question 1 | Correct Mark 1.00 out of 1.00

Convert the following algorithm into a program and find its time complexity using the counter method.

```
void function (int n)
{
    int i= 1;
```

```
    int s =1;
```

```
    while(s <= n)
    {
         i++;
         s += i;
     }
}
```

Note: No need of counter increment for declarations and scanf() and count variable printf() statements.

Input:

A positive Integer n

Output:

Print the value of the counter variable

For example:

Input	Result
9	12

Answer: (penalty regime: 0 %)

```c
#include <stdio.h>
int main()
{
    int n;
    scanf("%d", &n);
    int count = 0;
    int i = 1;
    count++;
    int s = 1;
    count++;
    while (s <= n)
    {
        count++;
        i++;
        count++;

        s += i;
        count++;
    }
    count++;
    printf("%d", count);
    return 0;
}
```
